

Want to meet other 8th grade girls in Durham County who are also interested in Math and Science?

Want to find out what fun and lucrative careers you can have in Math, Science, Engineering, or Technology?

What **WAM** is NOT!
WAM is NOT work. WAM is fun!
There are no tests, homework or quizzes.
WAM is NOT a tutoring program. We don't help with homework or studying for tests.
Bring your interest in Math and Science and we'll show you what you can do with it.

Mentoring Madness in May!
Our final event of the year! You and your parents are invited to a dinner in your honor to celebrate what you've accomplished in the program. We'll provide dinner, Mathematics related entertainment and one last Math Competition.
Show off what you've done during the semester by working with your mentor on a Scrapbook page.

The Women and Math Mentoring Program is funded by Dr. Steve Shafroth and North Carolina Central University, supported by Durham Public Schools, and administered in conjunction with the North Carolina chapter of the Women and Mathematics Network.

Do you like Math and Science?

IBM Lego Robotics

Want to attend Math and Science related events in the Triangle?

What you need to do to get involved!

Tell your math or science teacher you are interested in applying! Be able to miss one day of school (excused absence) Be able to attend monthly events with your mentor groups. - most activities are after school and on weekends

What does it cost?

It's FREE! Some activities may have very small admission fees (less than \$10) Almost all activities are free. Talk to us if money is a limiting factor.

How long does it last?

You will be assigned a mentor in December. You will meet your mentor and other group members in January. January through May you attend activities around the triangle with your group. Most participants want the program to last longer.

What you'll get!

Your own personal female mentor who is a professional in a Math or Science related field.

Small 2-3 student mentor groups that participate in hands-on activities.

T-shirts

Math competitions with prizes for you and your school.

Experiences and friendships of a lifetime.

Extracurricular activity for High School/College Applications.

Summer Scholarships
